Mojokerto, East Java | Open to Work: On-site · Hybrid · Remote

PROFESSIONAL SUMMARY

IT Support Specialist with more than **4 years of experience** managing IT infrastructure in multinational manufacturing and agribusiness environments. Proven to increase ticket settlement SLA by **20%** and reduce repeat ticket volume by **15%** through the development of a Knowledge Base. Experts in networking (Cisco, Mikrotik, Ubiquiti), server administration, Active Directory, ITSM, and IT asset management. S1 Information Systems Graduate with a GPA of **3.57/4.00**.

WORK EXPERIENCE

IT Support Specialist

PT. Kobin Ceramics Industry (Tancorp Group) — Ngoro, East Java

January 2026 – Present

Ceramic Manufacturing

- **End-to-End Infrastructure:** Manages servers, LAN/WAN networks, and the entire IT hardware of a large-scale manufacturing company to ensure operations run without interruption.
- **Single Point of Contact:** Be the primary point of contact for all employees for technical needs — providing professional phone, chat, and face-to-face support.
- **Troubleshooting:** Diagnosing and resolving hardware/software technical incidents on-site and remotely — contributing to a 20% increase in SLAs.
- **User Education:** Provide guidance and mini-training to employees so that they can use IT tools independently and efficiently.

IT Helpdesk Technician L1 & L2

PT. Indonesia Tri Sembilan (Alliance One International Group) — Ngoro, East Java

September 2021 – January 2026

Multinational Agribusiness

- **L1 & L2 Helpdesk:** Handling the entire spectrum of technical ticketing from basic hardware/software issues to complex network configurations as per SLA.
- **Ticket Management:** Manage the entire Service Desk flow: categorization, prioritization, escalation, and resolution — no missed or late tickets. Increased SLA: +20%.
- **Identity & Access Management:** Manage Active Directory accounts, folder/application permissions, password resets, and new user provisioning.
- **Knowledge Base:** Compiled a Self-Help FAQ documentation that successfully reduced the volume of FAQ tickets by 15%.

Junior Web Developer (Internship)

Acceleration Lab — SMK Negeri 1 Dlanggu Street Vendor Program

January 2019 – May 2019

Predicate: Very Good

- Develop web application features from scratch in a real professional environment during the PKL SMK period.
- Won the title of Very Good for the quality of work and professionalism during the program.

ANNUAL INFRASTRUCTURE PROJECTS

PT. Indonesia Tri Sembilan — Annual Off-Session Project

- 2021 — Built PTP's computer network and CCTV system installation in the company's new warehouse.
- 2022 — Migration of the company's network system from Mikrotik to Cisco Meraki (cloud-managed networking).
- 2023 — Rejuvenation of PTP's servers and installation of computer networks in the new warehouse.
- 2024 — Computer rejuvenation and mass OS migration from Windows 10 to Windows 11.
- 2025 — Rejuvenation of the CCTV system and replacement of network cables throughout the company's area.
